

HW: Current Event

***Flipgrid now has an integration tool. I have enabled it for this assignment in hope that it will make submission easier, but please email me if you try to use it and it doesn't work. You will need to navigate to flipgrid current events topic using the link below.**

Please check the dates below for your actual due date.

You cannot present on the same topic as anyone else in your class. It is your responsibility to check and make sure no one else submitted the article before you. Check the spreadsheet for your class.

If your name is missing from the tables below, then send me an email with the date you would like to present on (must be blank in the table).

Remember, this will NOT show up on the right date for you in Canvas. If you need that reminder then put an entry into canvas for yourself.

- Find a current event (last 12 months) from online or a live talk about

Include a link to the source in your submission

- Summarize the main points in a video and submit (via Flipgrid) to canvas **on or before** your assigned due date

be sure to address the following:

What's the main idea(s)?

Why is it interesting , significant and/or relevant to class?

Which of our major themes does it most closely relate to? why?

-Post a video to Flipgrid (use the links at the bottom of the page)you have 3 options

Option 1 - You can have someone record your presentation in class and post that

Option 2 - Post the video in advance and play the video in class

Option 3 - Talk about the article in class and submit a video to flipgrid that is not your actual presentation.

Remember, there is a future assignment where you will need to research and propose a topic you think should be covered in Biology During Spring Trimester. I would suggest you try to find some articles that are

related to the topic you would like to propose so you are both completing this assignment and researching for that assignment at the same time.
